

ANDROID TV / GOOGLE TV

Your image. On your canvas.

A free projector app for artists and designers. Position a reference, reveal its structure and create at your own scale.

FREE TO USE. OPEN SOURCE.

ACTUAL APP INTERFACE / ANDROID TV EMULATOR

Give your projector a place in your practice.

A reference on the wall is only the beginning. Projector Trace adds the controls that help you compose, understand and transfer it.

01

Place it precisely.

Move, scale and rotate the image. Adjust perspective at each corner to match the surface in front of you.

02

See what matters.

Bring out contours, simplify tones and add guides. Choose the view that makes the composition easier to read.

03

Stay at the canvas.

Use the remote to make adjustments. Keep your attention on the work instead of returning to a computer.

Your reference. Your controls.

A menu designed around the D-pad remote, with the image always in view.

Transform & perspective

Composition guides

Image-processing filters

Projector settings

REAL SCREEN CAPTURE. NO INTERFACE MOCKUP.

Put every line in its place.

Set the composition before you commit
to the first mark.

- Move, zoom, rotate and flip
- Corner-by-corner distortion
- Grid, rulers and center cross
- Canvas frames and crop
- Adjustable corner guides

GUIDES VIEW / GRID + CENTER CROSS + CORNERS

One reference. Three different readings.

Use processing to study structure, value and contour before you trace.

01 / ORIGINAL

Start with the complete reference: color, tone and texture.

02 / MAGIC OUTLINE

Emphasize contours and tune the level of detail and line weight.

03 / THRESHOLD

Separate light and dark into graphic shapes with an adjustable threshold.

Keep color in the picture.

Extract a palette from your reference and keep it beside the projected image.

Adjust the number of colors

Choose a palette mode

Move the palette

Resize it for your workspace

ACTUAL COLOR PALETTE VIEW

A different view. One press away.

With Blink enabled and menus closed, OK switches the projected view. Return to the reference whenever you need it.

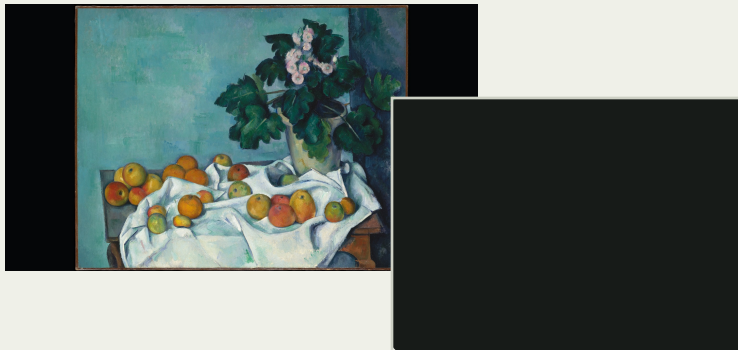

IMAGE / BLACK

Alternate the reference with a black screen.

IMAGE / WHITE

Alternate the reference with a white screen.

BLINK COMPARE

Cycle filtered, original, outline and black-and-white views.

Three steps. One remote.

01

Install

Download the APK and transfer it to your Android TV projector. Install it using a file manager.

02

Set up

Open an image from Gallery or Browse Files. Align it and choose guides or filters.

03

Make

Lock the adjustments, trace the reference and use Blink when you want to switch the view.

Made for a D-pad remote.

Arrows navigate and adjust. OK selects or switches. Back/Menu returns to the controls. No touchscreen required.

Set up the image. Shape the composition.

01

Image & profiles

- Gallery and file browser
- Save, load and clear a setup profile
- Close or reset the current image
- Lock image adjustments

02

Position & perspective

- Move and zoom
- Rotate with adjustable rotation step
- Fit image to the projection area
- Distort: adjust individual image corners
- Flip horizontally or vertically
- Reset transformations

03

Composition & guides

- Grid with adjustable size and color
- Rulers and center cross
- Canvas frame: presets, custom ratio and color
- Crop with individually adjustable edges
- Guide shapes with color and rotation
- Corner guides: position and color
- Reset guides or crop independently

Read the color. Reveal the structure.

Image processing

- Paint with adjustable detail
- Magic Outline: detail and line weight
- Threshold with adjustable level
- Channel Mixer
- Posterize with adjustable level
- Opacity and blending mode
- Brightness and contrast
- Edge / Outline: strength, thickness, detail, smoothing
- Sharpness and noise reduction
- Lines with adjustable strength
- Invert and adjustable blur
- Reset all filters

Color palette

- Extract a palette from the reference
- Adjust color count and palette mode
- Move and resize the palette
- Show or hide the palette

Adapt the workspace to your session.

06

Blink & compare

- Image / Black
- Image / White
- Compare filtered, original, outline and black-and-white views
- Switch with OK when menus and tools are closed

07

Projector & interface

- Projector orientation modes
- Menu size and screen position
- Menu auto-hide or always visible
- Keep screen awake
- D-pad, OK and Back/Menu control

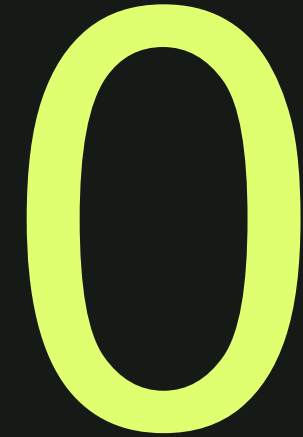

08

At-a-glance information

- File name and image dimensions
- Current scale and active filters
- Current mode and lock status
- App version and author information

For your practice. Free to use.

No subscription. No account. No paid unlocks.
Download the app, explore the source and make it your own.
